FMI: 920-236-4820 or healthandsafetycrimeprevention@gmail.com

Legislative Breakfast by reTH!NK

re:TH!NK, Winnebago's Healthy Living Partnership, held a county-wide Legislative Breakfast held Friday, April 20 in Neenah. Nearly 30 local decision-makers including school board representatives, city alderpersons, county board members and state legislators were in attendance.

The theme of the event was “Having an Aha! Moment” by learning about issues the community is facing, what the coalition is doing to address those issues and how decision-makers like you can help. A “Prevention Schtick” kicked off the morning by using satire to highlight the culture that we live in and what we are faced with every day while doing prevention work. You can view the video, starring some of our Winnebago County prevention partners by visiting www.rethinkwinnebago.org.

Grace, a middle school student from Oshkosh talked about how she has had a lot of opportunities in her life to be a “model student” but many other youth do not. She was followed by Serah Muinde and Hugh Holly from NOVA Treatment Services who talked about their personal experiences with addiction and why prevention is just as important as treatment. Kristen Jobe from the Boys and Girls Club explained what youth see and hear regarding marijuana use. Lara Vendola-Messer from the Winnebago County Sheriff's Office discussed current programs and ordinances in place that are working to address underage and excessive drinking.

Winnebago FACT youth Daniel Jandrin, Michaela Moore and Allison Udulutch discuss the importance of funding tobacco prevention programs like FACT (Fighting Against Corporate Tobacco) and the importance of having state-wide laws that reduce youth access to tobacco products (like equal taxes or moving all tobacco products behind the counter). They also educated the audience about FACT's Manipulicious campaign against Big Tobacco's deceptive candy-flavored, cancer-causing products and what FACT members are doing to stand up against the industry.

Melissa Kraemer-Badtke and Tom Baron from ECRPC discussed how Safe Routes to School and including health in planning can increase opportunities for physical activity and therefore reduce childhood obesity. The final two speakers included Peggy West from Oshkosh Area School District and Sandy Panzer from ThedaCare who discussed the food environment in schools and in the community. The event wrapped up with Q&A from the audience.

Share and be Aware: WI Bike Federation

Share & Be Aware is a unique, statewide bicycle and pedestrian safety program which will serve to educate not only bicyclists and pedestrians but, more importantly, the general motoring public.

Wisconsin is already a wonderful place to bicycle and walk. However, while 50% of Wisconsinites bicycle, and sidewalks are quite common, walking and biking comprise less than 10% of all trips. In Wisconsin, 40% of all trips are within two miles of the home. Many of these trips could be converted to walking and biking. It is clear that many people perceive biking and walking to be unsafe. While walking and biking are safe, there were 1,022 reported bicycle/motor vehicle crashes and 1,212 reported pedestrian/motor vehicle crashes in 2009.

Share & Be Aware will inspire more Wisconsinites to walk and bike and help Wisconsin establish itself as a world-class place for pedestrians and bicyclists.

Goals

- Implement a 2-year pilot program to establish the foundation for a sustainable, yearly, statewide bicycle and pedestrian safety education program
- Educate over 40,000 people by attending 40 events and reaching all 72 counties
- Reach 100,000s of people through 40 television/radio appearances and 40 newspaper articles
- Educate 4,000 bicyclists through classes
- Educate 750 children through classes

- Deliver 15 bicycle and pedestrian law mini-training sessions to law enforcement professionals
- Forge key, statewide relationships to sustain the program
- Create a Share & Be Aware safety website
- Create a grassroots network of empowered Wisconsinite to elevate the profile of bicycle and pedestrian safety throughout the State

Share & Be Aware's audience consists of two core audiences: bicyclists for direct education and motorists for mass media education and outreach on how to keep people biking and walking safe.

Our primary audience of Bicyclists is comprised of the following sub-groups:

Advocacy groups, clubs, retailers, teams, bicycle-events, bike companies (retailers/manufacturers), Facebook/YouTube fans, bike registrants/DNR trail pass purchasers and Universities.

Our sub-category of Motorists can be reached via the following: general community events and festivals, ad campaigns,

AARP membership, AAA membership, Drivers' Education Classes, car washes, Department of Motor Vehicles, insurance agencies, licensed taxi drivers/companies, free media.

Additionally, law enforcement agencies and their members will serve as a viable audience for the Share & Be Aware program. Programs for this audience will be developed later in the year.
